

Hydrogen Seminar

Safe selection, calculation and sizing of fluid system components for hydrogen systems

Key aspects of the training include:

- Fluid system components in various hydrogen (H₂) applications.
- Materials - Hydrogen embrittlement.
- Selection of tubing, valves, and pressure regulators for hydrogen.
- Sizing of piping/tubing - Flow velocities.
- Valve designs appropriate for hydrogen.
- Sizing of valves and pressure regulators.
- Ensuring technically permanent leakproof fluid system components.

Practical seminar for system operators, designers, plant engineers and manufacturers of fluid system components
